## **J2ME IM Client Download Instructions**

The Jataayu J2ME IM Client can be downloaded on your mobile handset by following the instructions mentioned below. You need to have GPRS enabled on your handset in order to download and use the client.

- 1. Send an SMS message to 57070 with the message contents as 'IM' (case insensitive) only. You may be charged a nominal amount for this SMS by the service provider.**
- 2. You shall receive a new SMS message shortly in response to the message sent in Step 1. The contents of the message shall contain a URL (<http://218.248.73.65:8182/bsnl/initProfile>).**
- 3. Click on the URL. Select the proper access point to connect to the GPRS network. A WML page shall be displayed on your mobile handset.**
- 4. The WML page requires you to fill in the following information.**
  - a. Nickname**
- 5. Click on 'Subscribe' once you have entered the necessary details. This should provision you on the IMPS Service.**
- 6. Once provisioned, your login ID and password are sent to you in the form of a separate SMS. You can also know password by sms PASSWORD to 57070.**
- 7. The appropriate J2ME client for your device starts downloading automatically.**
- 8. Complete the installation of the J2ME client on your handset.**
- 9. Once the installation is complete, open the application and click on 'Settings'.**
- 10. Specify the 'username' and 'password' and click on 'Save'.**
- 11. Go back to the main menu and click on 'Login'. Select the proper GPRS access point to allow the client to login to the IMPS server.**
- 12. You are ready to chat.**
